PROJECTS

Player Management (CRUD) – Flutter , RESTFUL API
- Developed and implemented a Player Management system using Flutter for front-end and RESTful APIs for back-end integration, enabling secure CRUD operations for player data with user authentication.
- Integrated RESTful APIs with token-based authentication, ensuring secure data handling and real-time synchronization of player records through JSON data exchange.

Travel website -HTML, CSS, and JavaScript
- Designed and developed a responsive Travel website using HTML, CSS, and JavaScript, providing users with an intuitive interface for exploring destinations, booking options, and travel information.
- Implemented interactive features such as image sliders, dynamic content loading, and form validation to enhance user experience and engagement on the platform.

Movie Rating and Review app – React JS, HTML ,CSS ,JavaScript
- Developed a Movie Rating and Review app using React JS, HTML, CSS, and JavaScript, integrating OMDB API for dynamic movie data fetching and display.
- Implemented user authentication, personalized reviews, and a responsive UI, enhancing user experience across devices.
